Faculty Handbook 6.6 POLICY ON THE CARE AND USE OF ANIMALS

At this time, CMC supports the use of animals in research only by faculty assigned to the W.M. Keck Science Department.

The use of animals in research is subject to federal and state statutory controls and ethical considerations. Additionally, faculty members of the W.M. Keck Science Department are subject to the regulations imposed by the department’s Guidelines for the Use of Animals in Research and must receive written approval from the Institutional Animal Care and Use Committee (IACUC) before beginning any research involving the use of animals.

Other Claremont McKenna College faculty members who are interested in conducting research using any animal species must contact the Dean of the Faculty who will work with the faculty member and Keck IACUC to determine whether that research will be allowed, how the research will be supported, including animal care protocols and facilities, and how the research will be monitored in ways that comply with all federal, state, provincial, and local laws and regulations.
