

Here's my Study Abroad Story

Travis "Moose" Halpern SIT: Southern Cone Buenos Aires, Argentina

Major: Economics/Psychology dual

Program Description: The Southern Cone Program Focuses on economic development and social change in the MERCOSUR region of South America (Argentina, Uruguay, Paraguay, and Brazil).

Typical Day: Each day I would go to class and spend time with my friends from the program. I would then go home and chill with my host brothers before trying to have some adventures either exploring the city or playing some fútbol.

Highlights: The great friends I made from all over the world.

Challenges: Having to eat mayonnaise with everything.

Advice? Enjoy the experience for what it is; getting to know a different culture and people from their perspective.
