

Table of Contents

Released 4/28/2023

In this report, we review and compare the responses of students at Claremont McKenna College who took the HEDS New Student Survey in Fall of 2022 to the responses of student at other institutions.

This report consists of a series of worksheets in which we summarize the survey data with different levels of granularity. The Indicator Summary worksheet provides a quick comparative overview of the three indicators that we measured in this survey. The next three worksheets provide more detail on how students with different identities and backgrounds responded to each of the three indicators. The final worksheet shows how your students responded to each closed-ended question on the survey.

You can use the Table of Contents (see below) to navigate this report.

Click on the underlined names below to jump to the worksheet you would like to view: 1. Indicator Summary 2. Academic Motivation Indicator 3. Grit Indicator 4. Worries Indicator 5. Frequency Tables 6. Information about Respondents 7. Technical Information 8. Data Sharing Practices

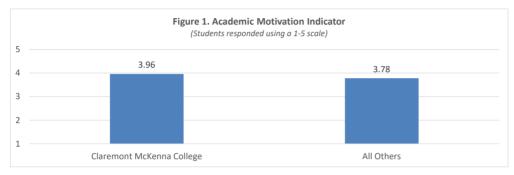

Indicator Summary

Back to Table of Contents

The figures below compare your institution to other institutions on three indicators from the New Student Survey: (1) Academic Motivation, (2) Grit, and (3) Worries. The Academic Motivation Indicator measures interest in working hard on academics, getting good grades, and engaging challenging intellectual material. The Grit Indicator measures perseverance and passion for long-term goals. Finally, the Worries Indicator assesses how often students worry about academic, social, and economic issues.

Below each figure, we use effect size to gauge the size of the difference between your institution and other institutions.¹

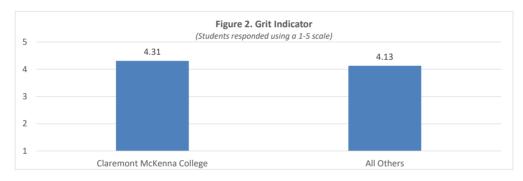

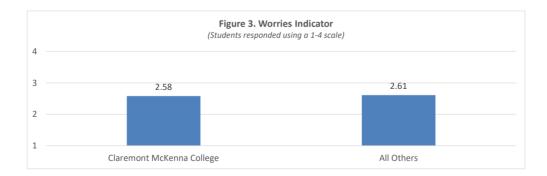

Figure 2. 11 Medium positive difference

¹"Effect size" measures the magnitude of the difference between the mean score for your students and the mean score for students at all other institutions. We only calculate effect size when the mean is based on 10 or more people.

For more details on effect sizes, see the Technical Information tab.

Academic Motivation Indicator

Back to Table of Contents

In the table below, we summarize data for different groups of your students on the Academic Motivation Indicator. This indicator measures students' interest in working hard on academics, getting good grades, and engaging challenging intellectual material. We used this indicator extensively in the Wabash National Study, and is positively related to a wide range of outcomes, including psychological well-being, need for cognition, interest in reading and writing as a means of learning, openness to diversity, and interest in political and social involvement.

We compute this indicator by averaging the level of agreement that a student expresses for each of the following statements from the first question on the survey.

Please indicate your level of agreement with each of the following statements.

Response options: 1=Strongly disagree; 2=Disagree; 3= Neither agree nor disagree; 4=Agree; 5=Strongly agree

- I am willing to work hard in a course to learn the material even if it won't lead to a higher grade.
- When I do well on a test, it is usually because I am well-prepared, not because the test is easy.
- In the past, I frequently did more reading than was required in a class simply because it interested me.
- In the past, I frequently talked to my teachers outside of class about ideas presented during class.
- Getting the best grades I can is very important to me.
- I enjoy the challenge of learning complicated new material.
- My academic experiences (i.e., courses, labs, studying, discussions with faculty) will be the most important part of college.
- My academic experiences (i.e., courses, labs, studying, discussions with faculty) will be the most enjoyable part of college.

Please note, Academic Motivation is not a fixed characteristic. In our research, Academic Motivation is positively related to the quality of teaching and learning that students experience.

The table below shows the average level of Academic Motivation for different groups at your institution. Higher means indicate stronger motivation. We show comparisons between these groups at your institution and their counterparts at other institutions using arrows. Downward pointing arrows pointing indicate that students at your institution, on average, express less Academic Motivation than students at other institutions; arrows pointing up indicate higher levels of Academic Motivation. An "z" sign indicates that the groups are roughly the same.

Please note, we only show means for groups of five or more people, and we only calculate effect size when the mean is based on ten or more people.

Grit Indicator

Back to Table of Contents

In the table below, we summarize data for different groups of your students on the Grit Indicator. Duckworth et al. (2007) define grit as perseverance and passion for long-term goals. We used a subset of questions from Duckworth et al.'s original measure that focus on students' perseverance of effort. Bowman et al. (2015) and Fosnacht et al. (2019) have found that students' overall response to this group of questions is positively related to their engagement as measured by the National Survey of Student Engagement (NSSE) as well as their satisfaction with college, sense of belonging, and grade point average (see complete references below).

We compute this indicator by averaging the degree to which students indicate that the following statements apply to them.

How much do the following statements apply to you?

Response options: 1=Not like me at all; 2=Not much like me; 3= Somewhat like me; 4=Mostly like me; 5=Very much like me

- Setbacks don't discourage me. I don't give up easily.
- I am a hard worker.
- I finish whatever I begin.
- I am diligent. I never give up.
- I have overcome setbacks to conquer an important challenge

Please note, we do not conceptualize Grit as a fixed characteristic, but one that can be positively influenced by encountering engaging experiences in college.

The table below shows the average level of Grit for different groups at your institution. Higher means indicate higher levels of Grit. We show comparisons between these groups at your institution and their counterparts at other institutions using arrows. Downward pointing arrows indicate that students at your institution, on average, express less Grit than students at other institutions; arrows pointing up indicate higher levels of Grit. An "~" sign indicates that the groups are roughly the same.

Please note, we only show means for groups of five or more people, and we only calculate effect size when the mean is based on ten or more people.

Worries Indicator

Back to Table of Contents

In the table below, we summarize data for different groups of your students on the Worries Indicator. We first developed this indicator in 2020 for our COVID-19 surveys that helped institutions learn more about student, faculty, and staff experiences in the first phases of the COVID pandemic. The Worries Indicator assesses how often students worry about academic, social, and economic issues.

We compute this indicator by averaging how often students indicate that they worry about the 10 items listed in the following question.

How often do you worry about the following?

Response options: 1=Never; 2=Sometimes; 3= Often; 4=Very Often Doing well academically in college Making friends Paying bills (tuition, books, etc.) Meeting the expectations of others Balancing class, social, family, and other life responsibilities Maintaining my mental health and well-being Figuring out what I want to do with my life National/global issues that impact society at large (e.g., climate change, the political environment, social inequality, COVID-19) Having enough to eat day-to-day Having a safe and secure place to sleep every night

The table below shows the average level on the Worries Indicator of different groups at your institution. Higher means indicate higher levels of worry. We show comparisons between these groups at your institution and their counterparts at other institutions using arrows. Downward pointing arrows indicate that students at your institution, on average, express lower levels of worry than students at other institutions; arrows pointing up indicate higher levels of worry. An " \approx " sign indicates that the groups are roughly the same.

Please note, we only show means for groups of five or more people, and we only calculate effect size when the mean is based on ten or more people.

Understandings Regarding the Use of Information Gathered for HEDS

Data Sharing Practices

Back to Table of Contents

You can share this report without any restrictions. We send each participating institution this report, comparing their results to those of other institutions. The report aggregates data from all other institutions into one comparison group and therefore does not identify data from other individual institutions.

Back to Table of Contents

Technical Information

This report summarizes data from 32 institutions (listed below) that administered the 2022 HEDS New Student Survey. The average response rate was 54%.

Participating Institutions and Number of Responses				
	# of Respondents ¹	Response Rate ²		
Agnes Scott College	166	65%		
Augustana College	204	31%		
Beloit College	235	74%		
Biola University	727	77%		
Cardinal Stritch University	38	9%		
Champlain College	398	67%		
Claremont McKenna College	177	53%		
Dominican University of California	95	35%		
Eckerd College	337	57%		
Emerson College	529	52%		
Fresno Pacific University	97	23%		
Hanover College	263	91%		
Heidelberg University	218	86%		
Hope College	710	78%		
Illinois Wesleyan University	230	54%		
Kenyon College	366	68%		
Lawrence University	183	44%		
Lewis & Clark College	504	71%		
Olivet College	70	21%		
Pacific Lutheran University	234	36%		
Roanoke College	388	76%		
Seattle Pacific University	209	28%		
Simpson College	283	82%		
St. Lawrence University	500	92%		
St. Norbert College	420	83%		
St. Olaf College	472	53%		
St. Thomas University	329	41%		
The College of Saint Rose	96	22%		
The University of Findlay	489	55%		
Tusculum University	166	56%		
University of Puget Sound	275	62%		
Virginia Wesleyan University	29	10%		
Westminster College (UT)	120	50%		
Whitman College	142	40%		

¹Respondents include students who answered at least one question.

²We calculated the response rate by dividing an institution's number of respondents by the number of emails delivered through Qualtrics. *Institution used authentication method, and response rates for these institutions do not factor in bounced email addresses.

Indicators

This file contains information on three dimensions of undergraduate experience. The three indicators and their reliabilities are:

• Academic Motivations – 8 statements, Cronbach's = 0.71

• Grit – 5 questions, Cronbach's = 0.81

• Worries – 10 questions, Cronbach's = 0.78

We only calculate indicator scores when students answered every question in the indicator.

Calculating Mean

Please note, we only show means for groups of five or more people.

Calculating Effect Sizes

We calculated effect sizes for key comparisons rather than using tests of statistical significance. We have so many comparisons that using a test of significance for each comparison would increase the likelihood of a Type I error should the null hypothesis be correct in any of the comparisons. Unfortunately, correcting for this would dramatically reduce the power of our comparisons, thereby increasing the chance of Type II errors if the differences are the result of more than random influences. So, we have calculated effect sizes to provide a guide for assessing the magnitude of the differences between groups. We compared the means of two groups calculating effect size using Cohen's *d*. We only calculated Cohen's *d* when n > or equal to 10 in each cell in the comparison.

Following the practice of the National Survey of Student Engagement (http://www.rpajournal.com/dev/wp-content/uploads/2019/02/RPA_Summer_Fall_Issue_2018_A2.pdf) we used the following thresholds for small, medium, and large effect sizes for Cohen's *d*:

* Large – 0.5 * Medium – 0.3

* Medium – 0.1

* Small – 0.1

Demographic Calculations Used Throughout This Report

Race/Ethnicity

This information comes from Question 11, "What is your citizenship status?" and Question 12, "Which of the following racial or ethnic categories applies to your identity?" Students have to answer both questions to be included in the calculation. We labeled students according to the citizenship status and races and/or ethnicities they selected as follows:

• "US White" if the student selected "U.S. Citizen" and "White" or "Middle Eastern;"

• "US POC" if the student selected "US Citizen" and "African," "African American/Black," "Alaska Native," "Asian," "Asian American," "Caribbean/West Indian," "Hispanic or Latino/a," "Latin American," "Native American/American/American/American/Black," "South Asian," "South Asian," "Southeast Asian," or "Some other race or ethnicity;"

• "International" if the student selected "U.S. permanent resident but not a U.S. citizen" or "Not a U.S. citizen or permanent resident"

We do not include students who selected "Prefer not to respond" in this calculation.

• Parent(s) Education Level

This information comes from Question 13, "What is the highest level of education completed by either of your parents (or those who raised you)?" We've labeled students who selected "Did not finish high school," "High school," "High school," "High school," "High school," "Kerker as "First generation." We labeled students who selected "Associate's degree (A.A., A.S., etc.)," "Bachelor's degree (B.A., B.S., etc.)," "Master's Degree (M.A., M.B.A., M.S., etc.)" or "Doctoral or professional degree (Ph.D., J.D., M.D., etc.)" as "Not first generation." We do not include respondents who selected "Prefer not to respond" in this calculation.
