Claremont Accelerator

Claremont's first student-run accelerator

Our value proposition for:

1) Startups

We provide student-led projects with funding, alumni mentorship, and resources.

The resources that we provide include a dedicated team of student-operators eager to scale student-led ventures as well as access to AI platforms (e.g., Claude, DaVinci, Chat-GPT 4.0).

2) Students

We provide students with on-campus opportunities to gain operational experience (highly sought after by consulting and private equity firms), leadership skills, and technical expertise.

3) Ecosystem

1) Lowering the barriers to start new ventures (let's admit it, CMCers are busy people)
2) Connecting students interested in entrepreneurship
3) Providing alumni with a tangible way to engage and support the student community.

Organization	Real operational experience	Engaged alumni network	Making entrepreneur-ship more accesible	Student-run
